PROFILE

Backend Engineer and Computer Systems Engineering student (MUET) focused on building scalable, secure backend systems and APIs. Experienced in designing system architectures, database schemas, authentication and role-based access control, and third-party integrations. Interested in distributed systems, cloud architecture, and AI-powered workflow infrastructure.

EDUCATION

Bachelor of Engineering, Computer Systems
Mehran University of Engineering and Technology (MUET)

2026 – 2030

RELEVANT EXPERIENCE

Full Stack Developer
PresentoLab

Nov 2025 – Present

- Build and maintain the PresentoLab web application, delivering assigned backend development tasks end to end.
- Focus on backend development: application logic, REST APIs, database operations, and third-party integrations.
- Work across the stack with Node.js, Express.js, MongoDB/Mongoose, and React/Next.js, using Git for version control and standard deployment platforms for shipping releases.

Silinx
Backend Developer

Aug 2025

- Contributed to the backend and dashboard of Silinx, a maintenance management solution that helps reduce downtime, cut costs, and extend asset life through intelligent automation.
- Built application logic, APIs, and data management features supporting the web dashboard and companion app.
- Worked with Node.js/Express.js on the backend to support core platform functionality.

ADDITIONAL EXPERIENCE

Project Manager
Design Divine

Nov 2024 – Dec 2025

- Managed client projects and coordinated development and design workflows from kickoff through delivery.
- Worked with the team to assign and track tasks, communicate requirements, manage deadlines, and coordinate client deliverables.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++

Backend: Node.js, Express.js, REST APIs, JWT, OAuth

Frontend: React, Next.js, React Native, Vite, Tailwind CSS

Databases: MySQL, MongoDB, PostgreSQL, Supabase

Tools & DevOps: Git, GitHub, Postman, Docker, Netlify, Vercel, Render, Railway

Other: API Integration, Authentication & Authorization, Role-Based Access Control, Database Design, Testing

CERTIFICATIONS

Introduction to Generative AI - Google

2026

LANGUAGES

English: Full Professional Proficiency

Urdu: Native / Bilingual
